Theorem 2.1: Geodesic Repulsion Acceleration
(Boundary Acts as Repulsive Barrier)
Conflict Entropy $H(x)$
Lorentz Dilatation $\gamma(x)$
Normal Acceleration $a_x(x)$
Field Amplitude
Spatial Coordinate x across Boundary
Theorem 2.2: Destructive Nodal Horizon
(Zero-Amplitude Topological Trench)
Boundary Nodal Energy ($x = 0$) $\equiv 0$
Off-Boundary Energy ($x = 0.5$)
Wave Intensity $E(x)$
Boundary Tangent Coordinate y
